

PVC rigid film introduction:

Zibo Tianheng New Nanomaterials Technology Co.,Ltd. is a professional manufacturer of PVC Rigid Film which with high transparency, small flow, less crystal points. Visually our film should not have any holes, breaks, abruptions or wrinkles. Edges should be evenly cut.

1. Our mainly products:

Pharmaceutical Packaging Rigid PVC Film,
Food Grade PVC Rigid Thermoforming Film,
Garment Accessories Transparent Rigid PVC Film,
Folding Box PVC Transparent Rigid Film,
Cylinder Curling Clear Rigid PVC Film,
Tool Packaging Rigid Clear PVC Film,
Stationery Packaging Rigid PVC Sheet Film,
Printing PVC Clear Plastic Film,
60 micron cold alu PVC Transparent Plastic Film,
Metallized Color PVC Plastic Film,
Chocolate Packaging PVC Roll Film,
Vacuum Forming Rigid PVC Film,
Blister Packaging PVC Roll Film,
PVC Rigid Decoration Film,
PVC coated/uncoated overlay film,
PVC offset/inkjet sheet for card

2. Specification:

Thickness 0.13-0.80mm

Width 100-1300mm

Color: transparent ,clear with bluish ,white ,any color

3. Application:

PVC Rigid Film is a packaging material manufactured by calendering with highly luster,transparent,easily to thermoform, small flow ,less crystal points,impact tensile.

It can be use for tablets blister,capsules blister,injectable syringes blister ,food blister packaging,ChocolatePackaging,Toolblisterpackaging,Toy blister packaging, vaccum thermoforming food packaging can pack Candy, biscuits, fruit , toy thermoforming packaging ,cup lids thermoforming

Tool packing

Cylinder box

**Tablets,capsules,injec
table syringes**

Folding box

Windows

Stationery packaging

**Collar insert, Collar
brand, Collar butterfly**

Chocolate packing

Injection tray

About Us

- Over 20 years experience since 1995
- More than 17 production lines
- Taiwan technical team of 6 people

500

8,600
Square meter

4. Production Equipment

All line of productions are using auto feeding system and metering system Computer numeral control technology It makes exact ceighting precision on the dispensing. (FIY: Liquid dispensing $\pm 0.005\text{kg}$)The line start From two-roll pilger mill to 5 roll calender. All line of productions are computer auto controlled to effectively ensure the advanced technology of products and long-term stability of quality.

Finally finishing the roll by full auto winding machine . Max width 1300MM
We have 7 PVC production equipment ,so we will produce virgin ,color ,recycle on different equipment ,to make sure the stable quality ,other factory only have 1-2 production equipment ,so they have to produce all of quality in one machine ,so hard to control the quality .

Dear Customers,

Except the PVC film, we can also supply the PET/PP/PS/PETG/PC film, you can choose any of them to mixed packed into one container, welcome your contact.

Sincerely yours,

Shelly Shao
